

Chris Pitre

Chris Pitre is a senior water resources project manager at Golder Associates, Inc. with 25 years of natural resource experience, and the past 13 years focused on water resources management in Washington State. He has undergraduate degrees in chemistry and geology, and a graduate degree in hydrogeology. Mr. Pitre is involved in developing water resource policies in partnership with clients, watershed planning, and securing reliable and responsible water supply into the future. His areas of expertise include hydrogeology, watershed planning, water balance analysis, assessment of impacts from groundwater withdrawals on surface water (hydraulic continuity) and water rights. Mr. Pitre is capable of client guidance; project conception, development and management; cost control; and logistical coordination. He is frequently involved with establishment and coordinating of multidisciplinary teams in order to attain desired objectives. He is a past president of the Washington Hydrologic Society, editor for the Washington Section of the American Water Resources Association, and a regular lecturer at the University of Washington.
